CSTA 2027 Presentation Outline

- **Presenters are required to use the template provided below that outlines their presentation.**
- **The outline should not include anything that would identify the presenter.**
- The outline should be uploaded as a **PDF**
- The outline should include and match the time allotted for the proposal type: Workshop - 2.5 hours, Session - 1 hour, Mini-session - 20 minutes.
- For workshops and sessions, the outline should include learning goals, discussion questions, and activities that the presenter plans to cover in the time allotted for their presentation.
- For poster sessions, the outline should include how visitors will engage with your poster.

Proposal Title: AP Score Reports as Instructional Data

Learning Goals:
Participants use score-band exports and benchmark comparisons to identify meaningful gaps in AP data. They diagnose likely root causes with the CSA or CSP Content & Skills Matrices and prerequisite dependency checks. They build an action plan that connects a targeted intervention to AP Classroom resources. They design formative checkpoints that show whether the plan is working across the next school year. They apply the process collaboratively in groups, with and without College Board data.

Proposal Type: *select one of the following*

- ☐ Workshop - 2.5 hours
- ☒ Session - 1 hour
- ☐ Mini-Session - 20 minutes
- ☐ Poster - 2-hour display window

Time Allotted:	Topics Covered / Discussion Questions / Engagement Activities:
0:00–0:05	**Form groups and set data norms.** Pairs or small groups, with one member who has College Board IPR access in each group. Norms: data stays on the laptop, and no student names leave the group. The data-holder logs in to the College Board AP Scores website and confirms the score-band data is available. *Engagement:* groups assign roles (data owner, recorder, facilitator, supporter). Participants without data take the supporter role.
0:05–0:11	**Step 2: Build Assessment Literacy.** Review the worksheet glossary: score band, benchmark, and the effect of multiple test forms. *Engagement:* groups check the glossary terms against their own reports.

Time Allotted:	Topics Covered / Discussion Questions / Engagement Activities:
0:11–0:31	**Step 4: Dig into Student Data.** The data-holder sets up a data slice on the College Board AP Scores website, exports the score-band data, and imports it into the browser tool to compare against benchmarks. Circle four low-performing cells on the Data Deep Dive worksheet (CSA or CSP matrix). Run the Concept Dependency Checks. *Engagement:* each group names one unexpected pattern and the root-cause skill it suspects. *Discussion:* Which part of your own AP data surprised you, and what would you need to check before believing it? Where did the prerequisite check change your view of the root cause?
0:31–0:33	**Regroup by action area.** Groups re-form around the action area each one chose in Step 4. *Engagement:* members share the evidence behind their chosen area.
0:33–0:43	**Step 6: Develop Action Plan.** Choose one targeted intervention and connect it to AP Classroom resources. *Engagement:* each group shares its intervention and the reason for it. *Discussion:* Why did your group choose this intervention over the others you considered?
0:43–0:53	**Step 7: Plan a Formative Assessment.** Build one formative assessment from the AP Classroom question bank, selecting questions tagged to the action area's content and skill. Define the indicator it will measure. *Engagement:* groups check each other's indicators for measurability. *Discussion:* What evidence would tell you by winter that the plan is working?
0:53–1:00	**Wrap-up and resources.** Data Deep Dive worksheet with glossary, browser tool, and score-band export guide. Every participant takes home the action-plan template. *Discussion:* What would you need from your department to run this cycle with your own students?
