CSTA 2027 Presentation Outline

- **Presenters are required to use the template provided below that outlines their presentation.**
- **The outline should not include anything that would identify the presenter.**
- The outline should be uploaded as a **PDF**
- The outline should include and match the time allotted for the proposal type: Workshop - 2.5 hours, Session - 1 hour, Mini-session - 20 minutes.
- For workshops and sessions, the outline should include learning goals, discussion questions, and activities that the presenter plans to cover in the time allotted for their presentation.
- For poster sessions, the outline should include how visitors will engage with your poster.

Proposal Title: AP Scores to Instructional Action: A Quick Workflow

Learning Goals:
Participants explain why score-band exports and prerequisite analysis can reveal causes that averages do not show. They describe how benchmark comparisons help confirm where a gap is real. They outline the Data Wise steps for turning AP results into an action plan with formative checks. They describe how the take-home guide moves from analyzing their own AP data to an action plan.

Proposal Type: *select one of the following*

- ☐ Workshop - 2.5 hours
- ☐ Session - 1 hour
- ☒ Mini-Session - 20 minutes
- ☐ Poster - 2-hour display window

Time Allotted:	Topics Covered / Discussion Questions / Engagement Activities:
0:00–0:03	**Why averages stop short.** Ask what participants look at first when AP results arrive. Explain why averages and pass rates can hide where students struggle. *Engagement:* quick poll on what each participant currently looks at first.
0:03–0:07	**Why score bands and benchmarks matter.** Explain why mixed-performance groups can hide needs, and how multiple test forms affect comparisons. *Engagement:* predict whether a class-level or score-band view would show more.
0:07–0:11	**Why causes need a second look.** Explain prerequisite analysis conceptually, using one example from the Content & Skills Matrix as a picture. *Engagement:* name one suspected cause to test before choosing an intervention.
0:11–0:15	**The Data Wise map.** Present the four steps: Build Assessment Literacy, Dig into Student Data, Develop Action Plan, and Plan to Assess Progress. Explain what each step answers. *Engagement:* put the four steps in order and say what each one answers.

Time Allotted:	Topics Covered / Discussion Questions / Engagement Activities:
0:15–0:18	**Where formative checks fit.** Explain how the AP Classroom question bank's content and skill tags let a teacher build a formative assessment for an action area. *Engagement:* share one indicator they would use.
0:18–0:20	**Take-home and reflection.** Point to the take-home guide and browser tool, and to the 60-minute session for guided practice. *Discussion:* Compared with how you use AP results now, are you data aware or data driven?
